| <b>Skill-Sense – Employee Skills Management Platform</b>   <i>Flask, SQLAlchemy, MySQL, Bootstrap 5</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |
| <ul style="list-style-type: none"><li>Developed a Flask and Bootstrap 5 web application to track employee skills, training, and organizational structure with a modern responsive UI.</li><li>Integrated an AI chat assistant using enterprise LLM APIs for user support and implemented advanced reporting, including skills gap analysis and resource allocation reports.</li><li>Implemented role-based access control (RBAC), authentication, and audit trail logging for secure user and admin operations.</li><li>Designed with SQLAlchemy ORM, Flask-Migrate, and MySQL/SQLite, ensuring scalability, database migrations, and production readiness.</li><li>Developed comprehensive RESTful APIs for data access and integrated automated testing to ensure reliability.</li></ul> |                                                                                       |

- Built a fully functional ed-tech platform using the MERN stack (ReactJS, NodeJS, MongoDB, ExpressJS).
- Designed and implemented RESTful APIs for course management, user authentication, and content delivery.
- Integrated Razorpay payment gateway, allowing students to buy and sell courses securely on the platform.
- Implemented automated testing and validation to ensure robust application performance.

## Scholastic Achievements

---

**JEE Mains:** Attained a position within the top 5 percentile among 10 lakh candidates.

**Nomura KakushIN 8.0:** Finalist and among the top 20 teams across India.

**Indian Armed Forces:** SSB Interview Recommended from a competitive pool of candidates.

**Competitive Programming:** Solved 500+ problems on LeetCode and GeeksforGeeks, demonstrating strong problem-solving skills.

## Platforms, Languages, Technologies & Tools

---

**Programming Languages:** Python, SQL, PL/SQL, JavaScript, Java, Cpp

**Python Frameworks & Libraries:** Flask, NumPy, Pandas, SQLAlchemy

**Web Development:** RESTful APIs, ReactJs, NodeJs, ExpressJs, TailwindCSS, Bootstrap, HTML, CSS

**Databases:** MySQL, SQLite, Oracle, MongoDB

**Cloud & DevOps:** Docker, AWS (Lambda, EC2, S3, API Gateway), GitHub CI/CD

**AI/ML & LLM Integration:** OpenAI API, Gemini API, Claude API, Langchain

**Tools & Platforms:** Playwright, Git, GitHub, Postman, Figma, Linux, Windows
