

ANURAG CHOUBEY

Software Engineer | Python, AI & LLM Automation | Oracle Fusion ERP/HCM/SCM

+91 9977867818 | anurag.choubey03@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

AI-focused software engineer specializing in **Python** and **FastAPI** development, Oracle Fusion (ERP/HCM/SCM) automation, and agentic **AI** systems. Skilled in building **LLM**-integrated automation platforms, **RAG** pipelines, and multi-agent orchestration that cut QA effort and testing costs by up to 45%. Oracle Cloud certified in **AI**, **Generative AI**, and Data Science.

WORK EXPERIENCE

Trainee Programmer, Yash Technologies

Jan 2025 – Present | Pune, India

- Architected and led an AI-powered Oracle Fusion (ERP/HCM/SCM) test automation platform (Playwright + **LLM** agents), driving end-to-end regression testing across quarterly Fusion updates (26A/26B) and cutting manual QA effort and testing costs by ~45%.
- Designed and deployed autonomous **AI agents** in Oracle AI Agent Studio, including an Order-to-Cash (O2C) multi-agent orchestration architecture (supervisor + worker agents for order orchestration, inventory, compliance, shipping), with hands-on extension into SCM and HCM use cases.
- Built a **RAG**-based policy document chatbot (**LangChain** + **OpenAI API**) achieving 90% retrieval accuracy across large Oracle documentation repositories.
- Redesigned core automation services from Flask to **FastAPI**, applying clean system-design principles (modular service layers, async request handling, queue-based task processing) with **LangChain/LangGraph** integrating **OpenAI** and **Gemini** APIs into scalable REST backends.
- Delivered Oracle Fusion technical support across two client engagements in the Middle East; built OTBI and BI Publisher (BIP) reports and Oracle SQL/PL-SQL procedures to automate business logic.

Software Engineer Intern, Graymatics

May 2024 – Jan 2025 | Singapore (Remote)

- Developed a **Python**-based video monitoring and analytics product, integrating **YOLOv8** object-detection models with **DeepStream** and **Triton Inference Server** for real-time crowd and video analytics pipelines.
- Built backend applications and REST APIs (Express.js, Flask); containerized and deployed multitenant services with **Docker** and **Nginx** reverse proxying for scalable, production-grade delivery.
- Deployed and managed workloads on **AWS** (S3, EC2, Load Balancers) and designed asynchronous processing with **Amazon SQS** for decoupled, fault-tolerant task queues.
- Designed a dashboard for the Gen-AI crowd-control application that helped secure a \$2,000 company grant; built the product website UX from scratch in Figma and React.js.

TECHNICAL PROJECTS

Skill-Sense — Employee Skills Management Platform

FastAPI · SQLAlchemy · MySQL · Bootstrap 5 · Redis Queue

- Rebuilt the platform's core service on **FastAPI** with a clean, modular system design: separated API, service, and data-access layers for maintainability and testability.
- Implemented an asynchronous **queue-based** task system (Redis-backed) to offload report generation and notification jobs from the request path, improving API response times.
- Built an **LLM**-powered support assistant for skills-gap tracking; implemented RBAC, auth, and audit-trail logging via SQLAlchemy ORM and REST APIs.

Study-Verse — Ed-Tech Learning Platform

MongoDB · Express · React · Node.js

- Built a full MERN-stack platform with REST APIs for course management, authentication, and content delivery, plus secure Razorpay payment integration.

EDUCATION

Shri Govindram Seksaria Institute of Technology and Science (SGSITS), Indore

2025

Bachelor of Technology in Information Technology — CGPA: 8.10/10

Kendriya Vidyalaya GCF 02 (CBSE) — Class XII: 84%, 2021 | Madhav Vidyalaya Mandir (CBSE) — Class X: 88%, 2019

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional
- Oracle Cloud Infrastructure 2025 Certified Data Science Professional

SKILLS

Oracle: Oracle Fusion ERP/HCM/SCM, **Oracle AI Agent Studio**, OTBI, BI Publisher (BIP), Oracle SQL, PL/SQL

Languages: **Python**, SQL, PL/SQL, JavaScript, Java, C++

Python / Web: **FastAPI**, NumPy, Pandas, SQLAlchemy, REST APIs, React.js, Node.js, Express.js, Tailwind CSS, Bootstrap

Databases: Oracle, MySQL, SQLite, MongoDB

Cloud & DevOps: Docker, Nginx, AWS (EC2, S3, Load Balancers, SQS), CI/CD

AI / LLM: **OpenAI API**, **Gemini API**, **Claude API**, **LangChain**, **LangGraph**, **RAG Pipelines**, **Multi-Agent Systems**

Tools: Playwright, Git, GitHub, Postman, Figma, Linux, Windows

SCHOLASTIC ACHIEVEMENTS

- Top 5 percentile among 1 million+ candidates in JEE Mains; Finalist, Nomura KakushIN 8.0 (top 20 teams nationwide).
- Recognized as Star Achiever at Yash Technologies for outstanding performance in the last quarter.
